

# AIR INTERLOCKED PTO VALVE PART NO: 00080/6/PUR

**3/2 manually operated valve with air reset to inhibit valve operation. This valve can be used with a separate solenoid valve to achieve the air reset function when the hand-brake is engaged. This ingenious valve allows for quick and easy assembly to panels and uses a positive pop up signal from the control knob to show valve and PTO are actuated.**

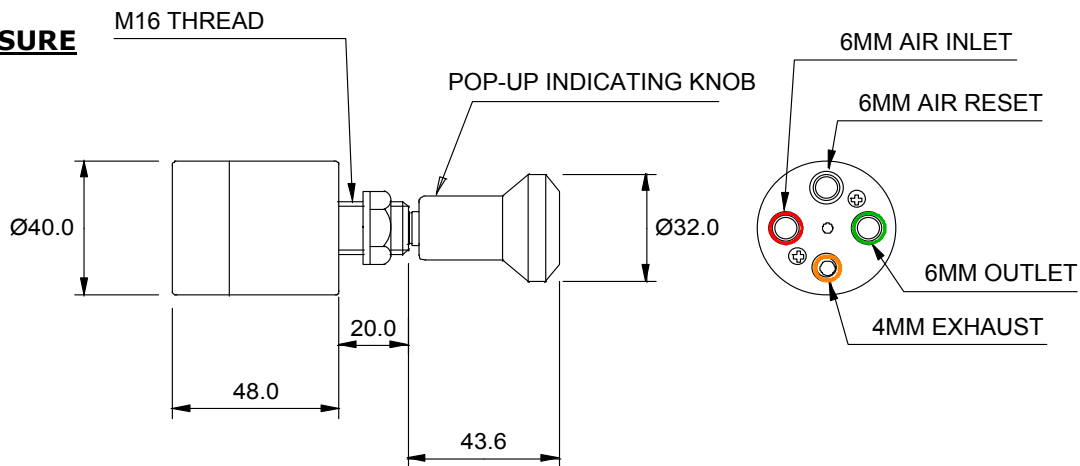

## SPECIFICATION

### OPERATING PRESSURE

**1–12 Bar**

### MATERIALS

**Acetal - Body  
Nitrile - Seal  
Acrylic - Knob  
Brass - Spool**
