

POP UP INDICATOR PART NO: 09660

This Indicator is used as a quick and reliable visual indication of the status of a pneumatic system. The unit shows red when pressurised and is designed to be panel mounted. A 4mm push in connection aids speedy assembly and requires no special tools. By removing the internal spring this unit becomes a memory indicator showing the last signal received.

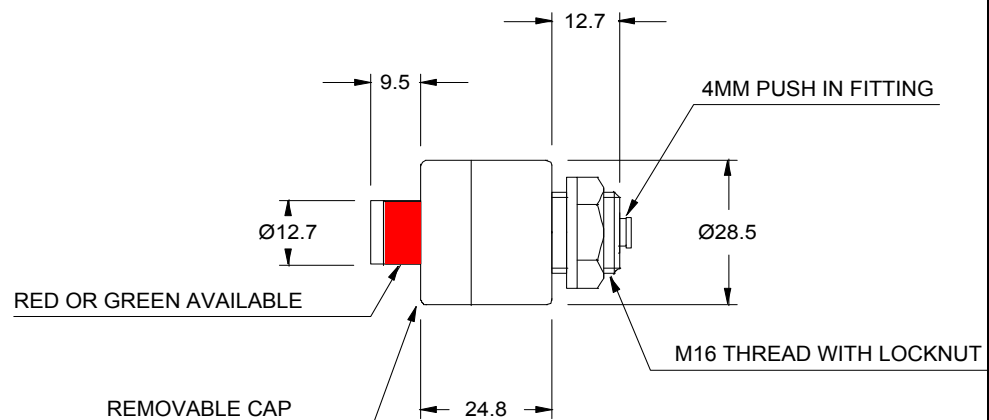

SPECIFICATION

OPERATING PRESSURE

1–12 Bar

MATERIALS

Acetal - Body
Nitrile - Seal
PVC - Piston
Stainless Steel - Spring
